

PEACOCK ASSOCIATES, INC.

PRESENTS

A community forum to discuss the proposed Verizon Wireless application for a emergency stand-by generator located at 1201 South Winchester Boulevard (Bethel Church).

DATE:

Wednesday, August 15th

TIME:

Presentation begins at 6:30 pm

LOCATION:

International Christian Center
3275 Williams Road, San Jose

Join us for a presentation to learn about the Verizon Wireless application to install a stand-by generator that will serve the wireless telecommunications facility in the event of an emergency. Experience has shown that diesel generators are the most reliable defense during a power failure and can keep a facility operating for long periods of time, which is crucial during times of emergency when communication services to emergency personnel and the community are most vital.

The proposed project consists of locating the generator in the northwest area of the Bethel Church property (rear parking area behind one of the church buildings). The generator will be fully enclosed by a new 8' tall masonry wall enclosure measuring 21' x 16'.

This state-of-the-art generator will meet all of the strict regulations of the Bay Area Air Quality Management Department (BAAQMD) and all other applicable local and State regulations.

If you have any questions or would like a copy of the site development plans or other generator related materials, please feel free to contact:
